

Manual qds.sdk.R package

January 27, 2015

qds.sdk.R

qds.sdk.R

Description

The qds.sdk.R package performs a simple call to qds-sdk-py to retrieve results of a HiveCommand.

Author(s)

Karandeep Johar: <karandeepj@qubole.com> and Dinesh Rathi: <dineshr@qubole.com>

quboleHiveCommand *calls hivecommand_from_r in /exec/r-python.py and return the result*

Description

<http://qubole.com> <karandeepj@qubole.com>

Usage

```
quboleHiveCommand(query = NULL, poll_interval = NULL, sample_size = NULL,
  macros = NULL, tags = NULL, cluster_label = NULL, notify = NULL,
  name = NULL, api_token = NULL)
```

Arguments

query	A String
poll_interval	A Number
sample_size	A Number
macros	A String
tags	A String
cluster_label	A String
notify	A Boolean
name	A String
api_token	A String

Value

the results of the query

Examples

```
## Not run: results = quboleHiveCommand("show tables", poll_interval = 5)
```
